### Abstract

Justice in education has two fundamental dimensions. The first is equal opportunity, which means that personal and social circumstances—such as gender, economic status, or ethnic origin—should not be a barrier to schooling. The second dimension is inclusion, which requires a minimum level of learning for all, meaning that everyone should be able to read, write, and do arithmetic. Combating school dropout helps to promote social advancement in both rural and urban areas. as the socio-economic status of families affects the level of education of their children. It is necessary to take all socio-economic factors into account in order to determine the relationship between them and children's learning, to study the extent to which the environment affects educational effectiveness, and to understand the interactions between them. There are many advantages to the urban environment for achieving successful educational outcomes, unlike the rural environment, which deprives children of the most basic educational infrastructure. This is the starting
